

Dermatology emergencies

Dr. Mariah Giberson

Objectives:

At the end of this presentation, participants will be able to:

- Recognize Life-Threatening dermatologic emergencies.
- Describe the systemic implications of dermatologic emergencies.
- Develop an initial management approach.
- Interpret key dermatologic clues to systemic disease.
- Optimize multidisciplinary collaboration in dermatologic emergencies.

Rash + Fever = Red Flag

Always assess for serious systemic illness.

Patterns matter

Erythroderma and retiform purpura signal underlying pathology.

Medication History is Critical

Identify drug-induced reactions early.

Severe Psoriasis & Eczema

Recognize their systemic and life-threatening complications.

Full-Body Examination is Key

Don't overlook mucosal involvement.
